Manual, inefficient accounts payable processes cost you a fortune. According to the Aberdeen Group, it can be as high as $38 per invoice and take up to 41 days. How much time and money are you spending to pay the bills?

Consider:

- Late payment penalties due to lengthy invoice processing cycle times
- High number of manual data entry errors causing duplicate or incorrect payments
- Inability to capitalize on prompt payment discounts
- Lack of visibility into outstanding liabilities
- Increased risk to your supply chain as a result of frustrated key vendors

Above all, the elimination of tedious and error-prone manual data entry frees up valuable resources, and presents an opportunity to make a direct and significant impact to your organization’s bottom line.

**Automation, Visibility and Control**

Accounts Payable Director can help increase productivity and lower processing costs. Best-in-class accounts payable organizations have reduced their costs to $4 or less per invoice by leveraging the right technology to automate the accounts payable process:

- Managed electronic invoice network
- Paper invoice conversion and on-demand access
- Self-service supplier management and invoicing
- Flexible invoice matching and data validation
- Standardized, automated and collaborative approval workflows
- Seamless integration with procurement and financial systems

Automating the receipt, matching and approval of invoices eliminates paper, decreases costs and improves speed and accuracy—and enables your accounts payable organization to become a true strategic partner to suppliers and internal customers.

Now your accounts payable can focus on your strategic initiatives and spend less time pushing paper! With SciQuest Accounts Payable Director, you can streamline your accounts payable processes, move to paperless invoicing and easily manage your relationships with suppliers.
WHY CHOOSE SCIQUEST?

SciQuest (Nasdaq: SQI) is the leading public provider of spend management solutions delivering value beyond savings. Through the continued release of key innovative technology and a fanatical drive toward making our customers successful, we deliver exceptional value in user experience, productivity and operational efficiency. Our cloud-based, mobile-enabled, source-to-settle platform addresses all stages of procurement from the automation of core processes to enabling sophisticated, strategic and multifaceted sourcing solutions. We specialize in handling simple procurement needs to the most advanced supplier and supply chain requirements. SciQuest serves a wide range of industries and organizations including many of the Global Fortune 500.
