The Science Catalog helps research-centric organizations meet the unique purchasing needs of their researchers. By giving your research teams access to more than 400 niche and midsize scientific suppliers in a single private marketplace, your purchasing department can improve eprocurement usage, reduce non-catalog orders, increase spend visibility, and advance your organization’s mission.

Your researchers dedicate more time to their mission

The Science Catalog allows researchers to focus more time on their work by enabling them to quickly search, identify, compare and order essential products related to their research. This also means a faster purchase-to-delivery time. Product information from multiple suppliers is categorized using SciQuest’s industry-leading taxonomy to enable configuration, advanced search, and comparison through SciQuest’s procurement automation solutions. The Science Catalog also includes two product ReSources—Chemical ReSource and Antibody ReSource—to streamline the acquisition of attribute-intensive products.

Your procurement department delivers service and savings

Purchasing professionals and researchers move forward faster and more accurately than ever. With Science Catalog you can:

- Enable a majority of your scientific suppliers rapidly and cost effectively
- Deliver robust product content to your research community through one easy-to-use online shopping interface
- Provide normalized product content without the burden of catalog maintenance
- Integrate with SciQuest strategic procurement solutions for increased user adoption, purchasing efficiency and spend visibility

Key Features

- Detailed product content for more than 400 leading scientific suppliers who participate in the SciQuest Supplier Network (SQSN)
- Specialized Product ReSources: Chemical and Antibody
- Industry-leading product taxonomy

Specialized Product ReSources

ReSources assist your researchers with the acquisition of attribute-intensive products. Chemical ReSource and Antibody ReSource are included with the Science Catalog. These product databases are combined with specialized search tools, such as chemical structure searching, to help end users quickly find, compare and acquire these unique materials from hundreds of specialty suppliers.

Integrated with SciQuest procurement solutions

The Science Catalog is optimized for use with SciQuest’s strategic procurement and automation solutions. Now you can configure catalog content to promote preferred suppliers and highlight best buys using the SciQuest Spend Director module. End users can search for and select items using decision-making tools such as advanced search capabilities and side-by-side product comparisons.

Content for all Science Catalog suppliers is categorized into SciQuest’s extensive product taxonomy of more than 2,500 categories. This normalization enables end users to perform advanced searches and compare products from multiple suppliers, while enhancing spend visibility to procurement managers.
