Our competitively solicited contract with The Baker Company provides you with access to the entire Baker line, as well as improved pricing and service options.

Baker provides tailor-made containment solutions for various disciplines in cell biology, animal research, instrumentation and other scientific research applications. Baker products have a reputation for maximum return on investment through lower life-cycle costs and more years of trouble-free operation than those of any other manufacturer.

**Contract Highlights:**

- Complete Line of Baker Products
- Built-to-Order Solutions
- Exclusive E&I Price List
- Freight Included (except Alaska and Hawaii)
- Discounted Parts via Online Replacement Parts Store

Through sixty years of continual research, testing, and improvement, Baker has earned its recognition as the industry's leading provider of primary containment equipment.

For additional details, please contact Michael Costigan, E&I Portfolio Support Executive for Research & Academic Healthcare, at mcostigan@eandi.org. You can also visit us at www.eandi.org.

Request Literature: [marketinglit@eandi.org](mailto:marketinglit@eandi.org)

RFP Number: This agreement was part of a multiple award from RFP# 683335, developed by E&I’s Scientific Strategy Team.

Installation Info: Inside Delivery - this service includes relocation of units from loading dock to laboratory. Pricing includes removal of packaging material and skid to a designated onsite location, and placement of unit on leveling legs. Pathways to labs must be clear of debris and construction materials. Any hoisting or rigging equipment needed to install the units will be the responsibility of the owner or contractor. This service does not include any utility, HVAC, electrical hookup or seismic restraint installation. The HEPA filters on the units leave the factory in tested working condition free of any rips or tears. Any damage during installation of HVAC hookup is the responsibility of the owner/contractor. Contact your sales representative for a quote to add this service as an option to your order.

Claims: Each skid comes with a drop and tell indicator on the outside of the packaging. Receiving should review this and indicate a tripped indicator on the paperwork. The receiver should immediately notify Baker and the end user of this condition so that a claim may be filed with the trucking company. Digital photos are always encouraged. If concealed damage is suspected, this should also be noted on the receiving documents.

Note: When placing orders, please identify yourself as an E&I Member. The information contained herein is confidential and proprietary to E&I and its members and is not to be shared with any third party.
