# Blowers

## BATTERY BLOWER

### 550iBTX

21 N  
 452 cfm  
 13.9 lbs

Powerful and ergonomic backpack battery blower with impressive blow force (21 N). Its low vibration and noise levels (61 dBA at 15m) allow you to work in public settings and since the blower is weatherproof, you can increase both flexibility and productivity.

- Brushless motor
- Intuitive keypad
- Boost mode
- Cruise control
- Weatherproof (IPX4)
- Ergonomic harness
- Integrated connectivity\*

## BATTERY BLOWER

### 340iBT

17 N  
 483 cfm  
 19.3 lbs

The 340iBT battery backpack blower delivers low levels of noise (62dBA at 15m) and vibrations with an impressive blow force. An intuitive interface and two BLi battery slots with an auto-switch feature keeps the machine running.

- Brushless motor
- High blow force
- Low maintenance

## BATTERY BLOWER

### 525iB

NEW

17 N  
 471 cfm  
 5.5 lbs

A handheld commercial battery-powered blower with performance equivalent to comparable gas blowers. Ideal for commercial landscapers with all-day power in a weatherproof design. You'll also appreciate ultra-quiet performance and reduced vibrations.

- Digital user interface
- Weatherproof (IPX4)
- Integrated Bluetooth

# Lawn Mower

## BATTERY LAWN MOWER

### W520i

40V  
 20 in  
 1.5-4.5 in

The W520i battery powered walk mower offers a high level of performance in a commercial duty package. The robust aluminum cutting deck with high-level components and heavy-duty commercial powerhead deliver extreme reliability. Energy optimization and double battery slots ensure extended mowing times, while the versatile Husqvarna batteries are a smart investment for any pro building a battery fleet. The W520i is a rugged mower that's ready for the most demanding full-time commercial work.

- Cast aluminum with side bumpers
- Weatherproof IPX4 rating
- Battery backpack option
- Intuitive keypad
- Power Boost

**Blowers** \*Equivalent sound pressure level at the operator's ear, measured according to EN ISO 11203, dB(A). Reported data for equivalent sound pressure level for the machine includes statistical uncertainty.

\*\*Noise emissions in the environment measured as sound power (LWA) is reported as guaranteed value in conformity with EC directive 2000/14/EC, with statistical dispersion included. Measured according to ISO 11094.

\*\*\*Equivalent vibration levels (ahv, eq) at handles, measured according to EN ISO 22867, m/s<sup>2</sup>. Typical statistical dispersion (standard deviation) of ± 1 m/s<sup>2</sup>.

**Hedge Trimmers, Trimmers and Brushcutters** \*Equivalent sound pressure level at the operator's ear, measured according to ISO 22868, dB(A). Reported data for equivalent sound pressure level for the machine has a typical statistical dispersion (standard deviation) of 1 dB(A). \*\*Noise emissions in the environment measured as sound power (LWA) in conformity with EC directive 2000/14/EC. Reported sound power level for the machine has been measured with the original cutting attachment that gives the highest level. The guaranteed sound power level includes variation in production as well as variation from the test code with 1-3 dB(A). \*\*\*Equivalent vibration levels (ahv, eq) at handles, measured according to EN ISO 11806-1 and ISO 22867, m/s<sup>2</sup>. Reported data for equivalent vibration level has a typical statistical dispersion (standard deviation) of 1 m/s<sup>2</sup>.

**Battery Lawn Mower** \*Noise emissions in the environment measured and calculated as guaranteed sound power level according to EC-directive 2000/14/EC. The guaranteed sound power level includes variation in production as well as variation from the test code with 1-2 dB(A). \*\*Sound pressure level according to EN ISO 5395-1. Declared sound pressure level has a typical statistical dispersion (standard deviation) of 1.5 dB(A).

**NOMINAL POWER** The EU machinery directive (2006/42/EC) came into force on January 1, 2010, requiring manufacturers to declare the nominal power of engines, in kilowatts (kW). The power rating of the engines indicated is the average net power output during a normal working situations and meets applicable noise regulations (at specified rpm, see owner manual) of a typical production engine for the engine model measured to SAE standard J 1349/ISO 1585. Mass production engines may differ from this value. Actual power output for the engine installed in the final machine will depend on the operating speed, environmental conditions and other variables.
