

Management and IT consulting

Holistic organizational transformation:
From vision to implementation

BerryDunn's management and IT consulting team helps clients improve their business processes, plan for and implement technology change, identify and manage risk, improve organizational performance, and advance employee well-being.

Transform your project goals into tangible results in these areas:

Digital transformation

Our experienced technology team can assist in any phase of a technology project, from system selection to project recovery.

- Business process improvement
- Change management
- ERP consulting
- IT assessments and planning
- Software assessment and selection

Enterprise risk management, compliance, and IT governance

We'll assess your current risk program and help you create a plan best suited to your organization.

- Enterprise Risk Management (ERM) consulting
- Data governance
- Disaster recovery and incident response planning
- Security compliance, risk, and gap assessments
- Security program development
- Virtual CISO

Human capital management

Our human capital management consultants help empower organizations to achieve their full potential, adapt to change, and build thriving workforces.

- Culture, engagement, and well-being assessments
- Organizational change management
- Organizational development and design
- Strategic planning
- Workforce well-being leadership workshops
- Well-being program planning and strategic plans

OUR AREAS OF EXPERTISE

We have subject matter expertise in a wide range of industries, including:

- Professional services
- Construction
- Financial services
- Healthcare
- Higher education
- Manufacturing
- Technology
- Natural resources and renewable energy
- Nonprofits
- Real estate and entertainment
- Telecommunications and energy
- Insurance companies
- Transportation companies

People, processes, and technology working together to move your organization forward.

The human aspect of projects can often be forgotten. Our team has a people-first approach backed by best practice methodologies and deep, first-hand technical experience to help you transform your organization and implement change effectively.

A client-centered, collaborative approach.

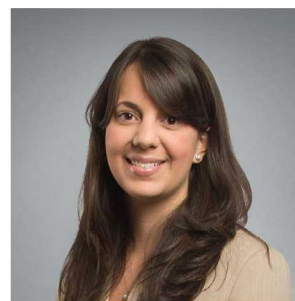

We engage a broad cross-section of each organization and integrate their needs into both short- and long-term planning.

Data-driven strategy.

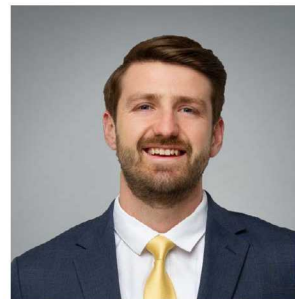

Our planning efforts are designed for practical implementation, with ongoing support to help ensure successful adoption.

Practical and actionable recommendations.

Our planning efforts are designed for practical implementation, with ongoing support to help ensure successful adoption.
