

BLUESCOPE CONSTRUCTION GOVERNMENT & COMMUNITY SERVICES

Case Study

Educational Institution

Tipp City, OH

Objective

Build a new bus vehicle maintenance facility and rehab an existing facility quickly and easily for the local school district.

Solution

3,200 SF new Butler maintenance facility and retrofit of the existing structure using MR-24 roof panels and Butlerib wall panels.

Benefit

The school district was able to get a quality facility they desired, delivered on time and within budget without the “headaches” of bidding.
