

CCT ADVANCE SU Single-Use Available in Conditioned Setups

CCT is proud to announce the introduction of our single-use conditioning services. The CCT Advanced SU96 single-use series offers high performance and considerable freight savings from its compact design.

With up to 50% less volume and volumetric weight than existing single-use designs, the CCT Advanced SU96 represents a substantial step forward in freight efficiency for the transportation of temperature sensitive products. Tested to ISTA 7D for 4+ days, the CCT Advanced SU96 is more than capable of protecting temperature sensitive products for over 96 hours.
