

## HIPAA Compliance Services

### THE CHALLENGE

The Health Insurance Portability and Accountability Act (HIPAA) protects the privacy of medical records and other health information shared among health plans, hospitals, and health care providers. HIPAA standards aren't just sound data protection—they're the law.

But often compliance with these standards is easier said than done. Navigating HIPAA requirements demands in-depth knowledge of the Security Rule, Privacy Rule, and the latest regulatory developments. Data protection involves administrative, physical, and technical safeguards. And because compliance goes beyond technology to encompass risk management, policies and procedures, and more, plenty of room exists for gaps.

*Presidio can help.*

### APPROACH, SOLUTION, AND RESULTS

For over a decade, we've helped organizations of all sizes gain an informed view of their HIPAA compliance status, address any issues, and achieve a defensible posture for annual risk assessments and security year-round. We'll work with your team to:

**Identify** compliance gaps by examining your processes and interviewing key stakeholders

**Verify** the findings through technical scanning

**Develop and implement** HIPAA-appropriate policies and procedures with physical, administrative, and technological safeguards

Through a HIPAA Gap Analysis presentation and written report, you'll receive an executive summary of current findings and a detailed technical picture of risk, supported by vendor-agnostic recommendations.

You'll soon find your operations aligned with the latest HIPAA standards, your staff freed up for other projects, and patients, partners, and regulators more confident than ever in your protection of sensitive healthcare data.

If a full HIPAA gap analysis is not needed but a high-level comprehensive evaluation of your organization's information security management is, consider engaging Presidio for a Security Program Assessment (SPA) with the addition of a HIPAA Security Rule Gap Analysis. This will result in the maturation of your holistic security program, and the HIPAA Security Rule add-on will concentrate on the electronic Protected Health Information (ePHI) – the key focus area in a HIPAA Gap Analysis.

### UNPARALLELED EXPERTISE IN COMPLIANCE AND CYBERSECURITY

Our highly credentialed consultants deliver expert guidance in the many angles of HIPAA compliance, including:

- ◆ Technical requirements, such as data encryption, access, and password protection
- ◆ Administrative practices to prevent information misuse offline
- ◆ Physical safeguards against human, natural, and environmental threats

They're part of an elite cyber security team comprised of specialists in cloud technology, infrastructure, data centers, and unified communications nationwide.

## HIPAA Compliance Services

### PROVEN PROCESSES FOR ENSURING ADHERENCE

With more than a decade of engaging with clients large and small, we've developed the industry's most thorough, informed assessment process and methodology, involving:

- ◆ **A baseline view of compliance** that includes an assessment of risk, business requirements, and strategy
- ◆ **Technical verification** through assessment, penetration testing, executive reporting, and more
- ◆ **Operational support** in areas such as the prevention, detection, containment, and correction of security violations
- ◆ **Planning and execution** for the design, integration, and optimization of compliant architecture and processes

### A FULL-SERVICE, FULLY COMMITTED PARTNER

Presidio operates as an extension of your IT department, collaborating with your team at every step. We take the time to thoroughly understand your risk, resources, and priorities, so we can bring the most informed compliance guidance to your operations and business.

Take steps now to get a benchmark of your organization's HIPAA compliance, address issues before an audit, and grow your data protection with evolving standards.

### ABOUT PRESIDIO CYBERSECURITY

Presidio Cybersecurity is a leading provider of comprehensive cybersecurity solutions. We offer a wide range of services designed to help organizations navigate the complex landscape of information security and protect their critical assets. With our team of experienced consultants and cybersecurity experts, we provide expertise and guidance to address the ever-evolving security threats that organizations face.
