Wyoming County Schools Modernize Procurement with ESM

ESM is excited to welcome Wyoming County Schools to the ESM community. Located in West Virginia, Wyoming County Schools selected ESM Purchase, integrated with WVEIS, to modernize its procurement operations.

Today, Wyoming County Schools rely on manual, paper-based processes when making purchase requests. Paper forms travel from desk-to-desk, sometimes getting misplaced in the process. And once approved, administrators must manually enter the request WVEIS, the finance system used statewide, where oftentimes, details are lost.

With the new ESM Purchase solution, all that changes. Integration with WVEIS will enable Wyoming County Schools to streamline processes, eliminate paper forms, and reduce manual effort. Purchase requests will become more accurate and more accessible to all teachers and administrators. And through integration with WVEIS, purchase orders will be created automatically, including all the details from the purchase request. As a result, the procurement team will gain full visibility into active requests and purchases in less time and with fewer steps than they experience today.

Grant Campbell, Treasurer of the Wyoming County Schools, recommended ESM Purchase integrated with WVEIS when he joined the team. Campbell previously worked at Fayette County where he drove similar improvements for the Schools using the ESM Purchase solution.

"Being part of that system, and ultimately being the one who ran it until I left, showed me that [ESM Purchase] is just the easy, no-brainer solution that we needed here too," said Campbell.

"We are excited to welcome Wyoming County Schools as an ESM customer," said Josh Faith, CEO, ESM Solutions. "We look forward to supporting the team as they modernize their procurement operations and reduce manual processes using an integrated ESM Purchase-WVEIS solution. Less time spent on procurement by teachers means more time for the students."
