Cold Chain Logistics

protecting the product to
protect the patient

Airgas is a proud business partner to E&I Cooperative Services. We now offer a full range of Cold Chain Logistics services.

We will deliver a sustainable value for the E&I members. Built upon strong partnerships that help achieve their vision, these alliances enable leverage of assets, harness buying power and ultimately provide exclusive savings opportunities.

- With Airgas you have a one stop shop for Cold Chain management , transport planning and gas solutions
- We work with over 80,000 Healthcare, Life Science & University customers, so we understand and acknowledge your challenges
- Our team will provide a personalized solution for your specific needs and requirements

Cold Chain Logistics

You seek a reliable partner who understands your needs and delivers solutions.

You need:

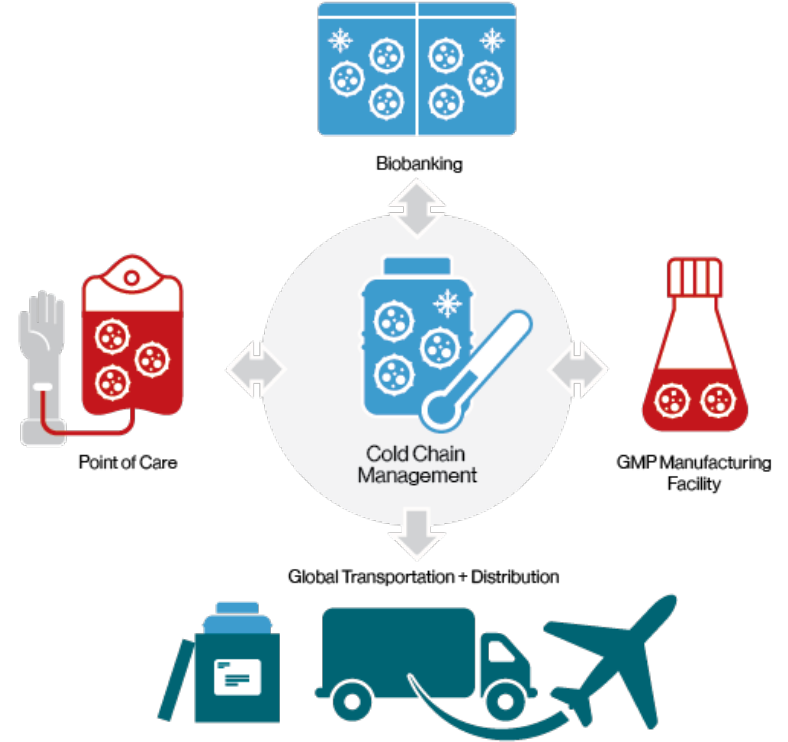

- To ship time and temperature-sensitive samples or products

You want:

- To mitigate risk, loss & damage of product
- Timely delivery of product
- Visibility of shipment
- Chain of custody transfer and management

protecting the product to
protect the patient

Cold Chain Solutions

protecting the product to
protect the patient

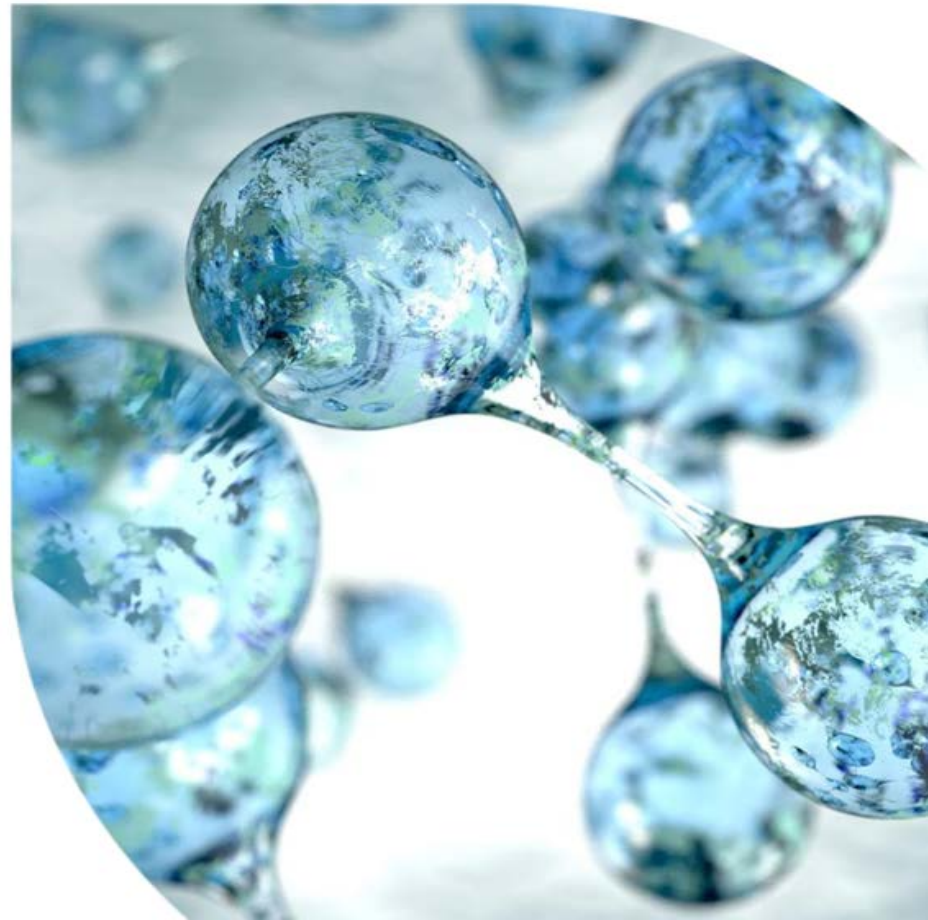

A full turnkey constant cold chain logistics solution offering managed services to accommodate pharmaceutical deep frozen to controlled ambient transport around the world.

There are medicines that are far more valuable to people than the price tag. Our conviction is to provide peace of mind by demonstrating an exceptional solution that is considered the best way to protect this value.

As a team, we will work towards bringing the different components and partners involved with the cold chain logistics process together. We share knowledge and consistently challenge ourselves to educate as many people as possible of our proficiencies and goals.

Thank you.
