Accounts Payable Automation

Free your finance team from manual work and unlock productivity across the business

Invoice Data Extraction and Approval Workflows Simplified

Organizations are under pressure to boost productivity while supporting remote work. Digital Invoice Capture and AP Automation can deliver efficiency gains of 60-95%. By capturing both header and line data, automating GL coding, and enabling powerful approval workflows, it makes automation straightforward, effective, and affordable.

What does Accounts Payable Automation do?

Everything from Digital Invoice Capture PLUS

Smart approval workflows

Route invoices through dynamic workflows, including parallel approvals, speed up processing.

Automated coding

GL coding is applied automatically, reducing manual effort and errors.

Mobile access and reminders

Approve invoices on the go with mobile optimisation, supported by email notifications.

Visibility and collaboration

Check invoice status in real time, add comments, and attach supporting documents.

Reporting and insights

Use dashboards, export reports to Excel, and maintain a full audit trail for complete visibility.

Global compliance and security

Handle multiple currencies and languages with built-in bank details verification for safe payments.

Why do YOU need it?

Compliance and audit-ready

Go paperless with fully traceable records that meet all tax requirements, keep seven years of history, and support best practices for audits and reviews.

Real-time control and faster approvals

Track invoices from receipt to payment with instant visibility, automated GL coding, and intelligent workflows that speed approvals, reduce errors, and cut out unnecessary manual work.

Save time and money across purchasing.

Enable approved online buying, match invoices automatically, and maintain real-time oversight of cash flow and accruals to lower costs and close month-end faster.

Get started with Accounts Payable Automation.
