

COMPLEAT

Integrated Online Buying

Empower your staff to buy online while controlling purchases before they happen.

Easily Account for Purchases From Online Vendors

We all buy online, but disconnected from finance it creates extra work with claims, reconciliations, and approvals. Integrated Online Buying delivers full visibility and control before spend, delighting staff with faster, cheaper purchasing while stopping waste. Our solution works with any online store, including Amazon Business.

What does Integrated Online Buying do?

Everything from Digital Invoice Capture and AP Automation PLUS

Faster, cheaper buying

Staff enjoy a smooth purchasing experience at lower costs, with up to 95% productivity gains.

End-to-end automation

Requisition, PO, receipting, invoice capture, and approvals are all digital, reducing manual work and errors.

Vendor flexibility

Works with any online vendor, including the world's first ["Punch-In" integration with Amazon Business.](#)

Control before spend

See and approve purchases before orders are placed, with automatic budget updates and GL coding.

Accuracy guaranteed

Invoices and POs always match, supported by real-time approval workflows and email notifications.

Smarter Insights

Access past pricing and spend data to make better buying decisions, preventing unnecessary spend.

Why do YOU need it?

Because everyone wins

Integrated Online Buying saves up to 95% of time on low-value invoices, delivers full control before spend, and makes budgets go further for everyone.

Full control with commitment and accrual accounting

Finance controls who buys what, where, and at what price, while consolidating vendors, reducing costs, and ensuring full commitment and accrual accounting.

Punch-In with Amazon Business

Our Punch-In integration lets staff shop on Amazon Business as normal while orders, invoices, and approvals flow seamlessly through Compleat and into your ERP.
