

COMPLEAT

Purchase-to-Pay (P2P)

Transforming the purchasing and financial management experience for everyone

From Purchase to Payment, We Have You Covered

Compleat Purchase-to-Pay (P2P) unites purchasing, approvals, receipting, digital invoicing, and payments with automated matching to simplify the entire process. It gives finance, budget holders, and procurement a real-time view of vendors, transactions, and budgets for better control.

What does Purchase-to-Pay do?

Provides full control of spend before ordering and boosts productivity by up to 95%.

Integrated Online Buying

Purchase directly from any vendor website with full control and visibility.

Simple purchase requests

Create POs quickly using templates or by duplicating past orders..

Automatic GL coding

Reduce errors and save time with auto-completed coding.

Smart approvals

Use powerful workflows to route requests smoothly through to order generation.

Budget control

Track spend against budgets in real time to prevent overspending.

End-to-end automation

From receipting to invoice capture, automated matching, and payments, every step is covered.

Why do YOU need it?

Stay in control of every purchase

Get complete real-time oversight of spend across your organization and automate invoice matching to ensure accuracy, compliance, and smarter decision-making.

Go paperless, stay connected

Give every budget holder instant access to transactions and budget status in one place, eliminating paper and keeping the entire business aligned.

Close faster, plan smarter

Replace slow month-end bottlenecks with real-time visibility of cashflow, commitments, and accruals to speed up reporting and strengthen financial planning.

A smarter purchase-to-pay process starts **HERE**.
