

**FILTRATION CONCEPTS**  
More Than Filters, Filtration Solutions

## **E&I members in the AR, CO, NM, OK and TX can take advantage of significant discounts on HVAC filter supply products and services available through Filtration Concepts. Filtration Concepts focuses on just-in-time inventory and delivery service of HVAC filters.**

---

As part of the Filt-Trac System, Filtration Concepts will comprise a master list of every air handler in a member's system. This information will be utilized to assign Filt-Trac numbers to all units, and a master log book will be created representing the specific filter needs associated with each unit. This listing will be submitted to each member for assignment of frequency and annual scheduling.

Filtration Concepts will then provide the filters according to the schedule determined by the member. Before delivery, filters will be arranged, packaged and labeled with the specific building name, unit location and box count. Specific documentation will allow for accurate recording of the date of service, resistance measurements, notes for next service and installer's signature. Filters are shipped on the first of each month or week.

Based in West Texas, Filtration Concepts has been providing HVAC filter service to a variety of customers for more than 30 years. **Filtration Concepts focuses on providing the delivery service of HVAC filters in a timely and cost effective manner for E&I members.**
