Think Global. Think Green.

The Environment — We believe now more than ever, that it is our responsibility to protect the environment and our precious natural resources for future generations. The growing importance of energy and environmental concerns continues to challenge us in this ever changing marketplace.

As an industry leader, Global continues to take proactive steps towards reducing the negative impacts on the environment. We are building “healthier” offices; investing in Research & Development and new technologies; reducing waste and the consumption of energy; and improving the quality of the air we breathe, all which can have a significant impact on our quality of life.

Global's recycled fabrics offer affordable, environmentally responsible alternatives to commercial textiles. We recycle 35,000 lbs. of fabric off cuts.

Epoxy powder coating process is solvent free. No harmful VOC's or lead. No toxins are released into the atmosphere.

Global has the products and resources to help your projects achieve LEED certification.

New technology allows us to reduce glue usage by 50%. In addition, our water based glue reduces emissions and requires less energy to apply.

Greenguard Certification

The GREENGUARD mark means that a product has been tested using stringent environmental chamber methods and found to meet GREENGUARD's Indoor Air Quality Standards. GREENGUARD Certified Products are low emitting and contribute minimal levels of pollutants to indoor environment.

Level Certification

level™ certification, based on the ANSI/BIFMA e3-2012 furniture sustainability standard, sets furniture manufacturers on a path toward greater sustainability over time. Based on environmental and social criteria set forth in the standard, a product's entire supply chain is assessed.
