Guiding Shoppers to Buy with Compliance in Mind

Business Challenge

Due to required regulation mandating that suppliers from a specific region be given preference during the procurement process, this customer recognized the need to guide their shoppers toward using local suppliers for procuring goods and services whenever possible. Additionally, they were required to provide reports to the regional government.

Approach to Solve

- Supplier categorization
- End user awareness
- Guided shopping for end users
- Focused on regulatory compliance

Solution

- Created a new supplier class with an associated logo.
- Added logo to all relevant shopping showcases
- Added terms and condition message to alert users of the new regulation upon log-in.
- Added cart validation rules that confirm the suppliers are eligible for the class, prior to cart being submitted.
