The future of fleet is sustainable: From the vehicles you operate to the materials you move, having your eyes on dedicated corporate social responsibility (CSR) initiatives gives your business a leg up on the future of your industry.

When planning for tomorrow, it's important to think about what CSR opportunities exist, and how they benefit your business holistically.

GOALS AND INITIATIVES

Holman Sustainability has built CSR benchmarks with the intent of tracking and promoting sustainability across the fleet world. That includes:

- Holman-developed waste and diversion tracking systems
- Employee Sustainability Ambassadors focused on education and advocacy
- Free EV charging stations at our global headquarters
- Due to waste diversion in 2023, Holman saved 6,610 metric tons of CO₂

We have targeted goals to continue focusing on accountable solutions, such as:

- Implementing new corporate utility tracking systems for energy and water usage
- Expanding free EV charging into our other offices
- Partnering with alternative fuel vendors to influence fleet fueling strategy

INTERNAL COMMITMENTS

Holman's offices are focused on energy efficiency with conscious facilities featuring:

- LED lighting and window tinting
- Energy Star printing system
- Low-flow sinks and toilets
- Water bottle refill stations
- Expansive corporate recycling program

*Your green fleet journey. **Elevated.***
