

Building Future-Ready Institutions for the Next Era of Transformation

Our mission is to modernize higher education at its core, improving access, efficiency, and student experiences in the AI-first economy

About Infojini

A Trusted HigherEd Technology Partner

Founded in 2006, Infojini Inc. is a trusted technology consulting and solutions partner, enabling higher education institutions to reimagine how they operate and deliver value. We collaborate with universities, colleges, and other higher education institutions across North America to modernize legacy platforms, integrate core systems, and automate mission-critical workflows, while driving differentiated outcomes at scale.

Roadmaps, governance, and program oversight

Training & Capacity Building

Practical training and mentorship for teams

Standards & Advisory Services

WCAG guidance and inclusive design advisory

Optional Add-Ons

Validation, rollout support, and documentation assistance

Institutional Transformation Across Core Functions

Leveraging deep institutional expertise, Infojini accelerates modernization across academic, administrative, and operational ecosystems.

Key Institutional Processes & Infojini's Strategic Advantage

Recruitment, Admissions & Enrollment

- ▶ CRM modernization, automated enrollment workflows, and system integration that improve yield and speed of time-to-enroll.

Academic & Learning Operations

- ▶ LMS-SIS integration, automated degree audits, and progression analytics that sharpen decision-making and outcomes.

Student Success & Financial Services

- ▶ Advising automation and secure financial workflows that improve retention and operational efficiency.

Research & Compliance Administration

- ▶ Digitized research lifecycle management with governed workflows and audit-ready reporting.

Finance, HR & Institutional Operations

- ▶ Workflow automation, role-based controls, and system modernization that strengthen accountability and resilience.

IT Service Delivery, Security & Reporting

- ▶ Zero-trust security, cloud-enabled operations, and governed data platforms that support compliance and decision-making.
