

Digital COVID-19 Contact Tracing Platform

Kiana Analytics, an industry leading provider of real-time location and predictive analytics, provides a ready-to-deploy, cloud-based digital contact tracing platform, leveraging years of experience with its facilities management and presence analytics platforms for workspace management.

Kiana's digital contact tracing platform can be deployed quickly and easily by utilizing your institution's existing Wi-Fi infrastructure, dramatically reducing costs and deployment time. Without requiring any installed application or software, Kiana's COVID-19 exposure discovery capability can be used to immediately pinpoint at-risk individuals, groups, and areas within your institution, and alert them, security, and your cleaning staff about unsafe conditions to limit the effects of exposure.

Contract Highlights:

- **Digital contact tracing:** Visual graphics and charts identify those who have been exposed and length of exposure.
- **Real-time data collection:** Digital contact tracing speeds up the process and virtually eliminates human error.
- **Immediate alerts:** All exposed individuals are immediately alerted on their mobile device when exposure reaches a critical threshold.
- **Quick to implement and use,** and easily managed by authorized personnel.
- **Encrypted data security & privacy preservation:** Privacy is ensured since no personal identifiable information is exposed outside of your institution.
- **Mobile devices identified** in the cloud by MAC address only.
- **Pinpoint & identify locations (zones) for surgical cleaning:** Zones visited by positive cases are easily identified for surgical cleaning, reducing expenses and disruption.
- **Space management:** Reengineer your school or campus by identifying high usage zones, areas where students cluster, and situations where social distancing guidelines are being violated.
