

# Our Custom Kitting + Packaging Solutions

Cenmed has 30 years of experience developing specimen transport, diagnostic packaging, and screening kits for healthcare providers worldwide. We listen to our customers and put your needs first to ensure a cost-effective solution that works. We meet your exacting specifications for product quality and performance, and our strategically placed warehouses and relationships with manufacturers allow us to achieve unparalleled speed to market. You can expect a fast response and a cost-competitive solution, regardless of the size of your order.

## Unlock the Potential of Customized Kits

Specimen collection needs vary across organizations. The right kit goes beyond convenience. It ensures adherence to protocols, simplifies compliance and boosts efficiency.

Proper specimen collection is crucial for accurate diagnoses. Our custom kits combine high-quality products, secure packaging, clear instructions, and compliant labeling. They empower your facility to:

**Streamline ordering and inventory processes**

**Increase compliance rates for collection protocols**

**Lower the occurrence of false positive test results**

**Reduce complexity in both workflow and training**

**Faster turnaround times for results**

**Optimize spending to achieve desired outcomes**

**Private labeling for your organization**

**Minimize the incidence of specimen contamination**

**Prioritize satisfaction by delivering exceptional value**

**Minimize total operational costs**

## The Cenmed Advantage

We ask a lot of questions to ensure that your custom kits meet your specific needs to help us fully understand your facility's operations and end kit users' characteristics and regulatory requirements. No matter your needs, we can provide you with a custom kitting and packaging solution that meets your specific requirements. Contact us today to learn more about our services.
