

Verlab HALO Smart
Professional Laboratory Grade Air Purifiers

Filtration of Gas, Viral & Bacterial Pollutants

Removes viruses & bacteria from the air in your:

Laboratory

Office

Classroom

The Erlab Halo now gives you the option of HEPA filtration in order to remove harmful particulates & aerosols from the air in your laboratory, office or classroom.

- Autonomous filtration unit no HVAC connection required
- Real time room and system monitoring technology
- Fast and simple to install
- Does not take floor space
- Very low energy consumption (50w)
- Captures chemical emissions and aerosolized contaminants at the source
- Zero release of pollutants to atmosphere
- Intuitive Smart light communication Remote management by app
- Alarm contact for BMS and BAS systems

Add an Ionization Disinfection System To Your HALO Order

An optional Ionization System can be used with the HALO that provides a 99.9% disinfectant. The ionizer releases ions that will attach to & kill pathogens by robbing them of life-sustaining hydrogen. The ions will also agglomerate other particles & gas molecules from the atmosphere, making them filterable.

Eligible for CARES Act purchases.
