

BLUESCOPE CONSTRUCTION GOVERNMENT & COMMUNITY SERVICES

Case Study

Educational Institution

Livonia, Michigan

Objective

Provide building shell design, materials, and formation for a new sports center.

Solution

Schoolcraft College was developing a rec facility that would be used by the local hospital. The project features 8 volleyball courts and 4 basketball courts plus the option of adding turf for soccer practice. It connects to an existing facility via a connector building.

Benefit

Serves multiple purposes for college and hospital. Streamlined procurement with direct purchasing capabilities.
