

Ellucian Procurement CFO SUMMARY SHEET

Increased spend visibility and
high-level management for
purchasing

A personalized, easy-to-use experience for
every user from presidents to students

A successful Chief Financial Officer (CFO) needs to
have a clear and up-to-date financial overview to
identify opportunities and risks behind financial data.

The CFO is a strategic business partner for
the President and other campus leaders, and
communicates effectively with finance-based
departments.

Using digital assets and AI, CFO's are poised to
transform how their institutions succeed. For this
transformation to prosper, the CFO must provide a
plan that includes mechanisms to track spend and
ROI to show how - and when - spend will deliver
excellent returns. They need data and software
to deliver on campus as well as the institution's
academic KPIs.

Ellucian Purchase assists with advanced scenario
planning and modelling to help CFOs inform strategic
decision-making while meeting key compliance rules.

Connect:

Connect people & communities to the resources
they need.

Collaborate:

Unify functions across your campus.
