

Space Utilization and Traffic Management Monitoring

Automate traffic management to avoid over crowding

Applications and Use Cases

- Washrooms
- Retail Stores
- Meeting Rooms
- Classrooms and Labs
- Other Enclosed Areas

People Counting

Simple and Effective Solution

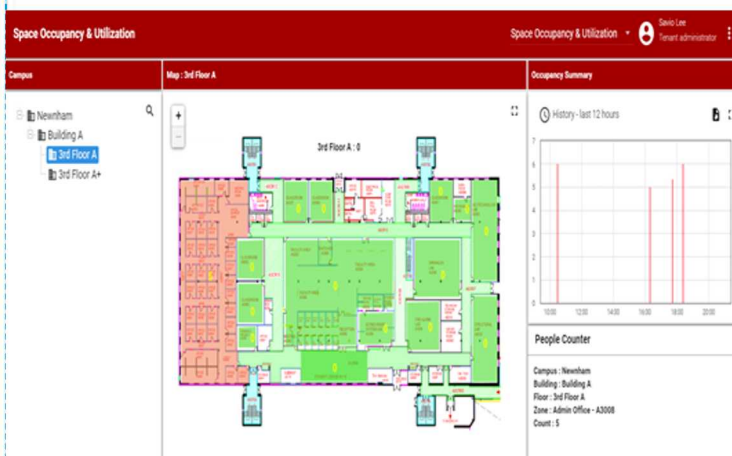

- Accurately count the number of people going in, out and total occupancy in real time.

Understand Space Utilization

- Powerful software and data analytics help make sense of the data captured and assist in making informed decisions

Manage Traffic and Avoid Over Crowding

- Avoid over crowding and automate the number of people going into an area to help enforce social distancing.
- Receive alerts when occupancy level reaches a preset threshold.

Real Time Interactive Dashboard

- Visualize Real Time Data captured by sensors for multiple-Sites on a Single Dashboard
- Automatically capture data at regular interval with time stamp for reporting.
- Automate sending of reports for quality assurance.
- Receive alerts via SMS and email when thresholds have been breached.
- View Trends and Charts in various time frames.
- Export Data to CSV or Excel File
