

Diagnostic Testing and Health Status Verification

Empowering Faculty, Staff, and Students with technology to play an active role in their personal healthcare!

HealthCheck® Digital Health Platform

HealthCheck® is a testing and health status verification solution for faculty, staff, and students designed to make COVID-19 prevention and mitigation manageable. SAFE's integrated technology platform and mobile App allows you to manage ongoing diagnostic testing and infection prevention workflows.

SAFE® Testing Solution

Operated in partnership with Mayo Clinic, the HIPAA-compliant, privacy-protecting solution supports protocols for self reporting of symptoms, testing options, and adherence reminders.

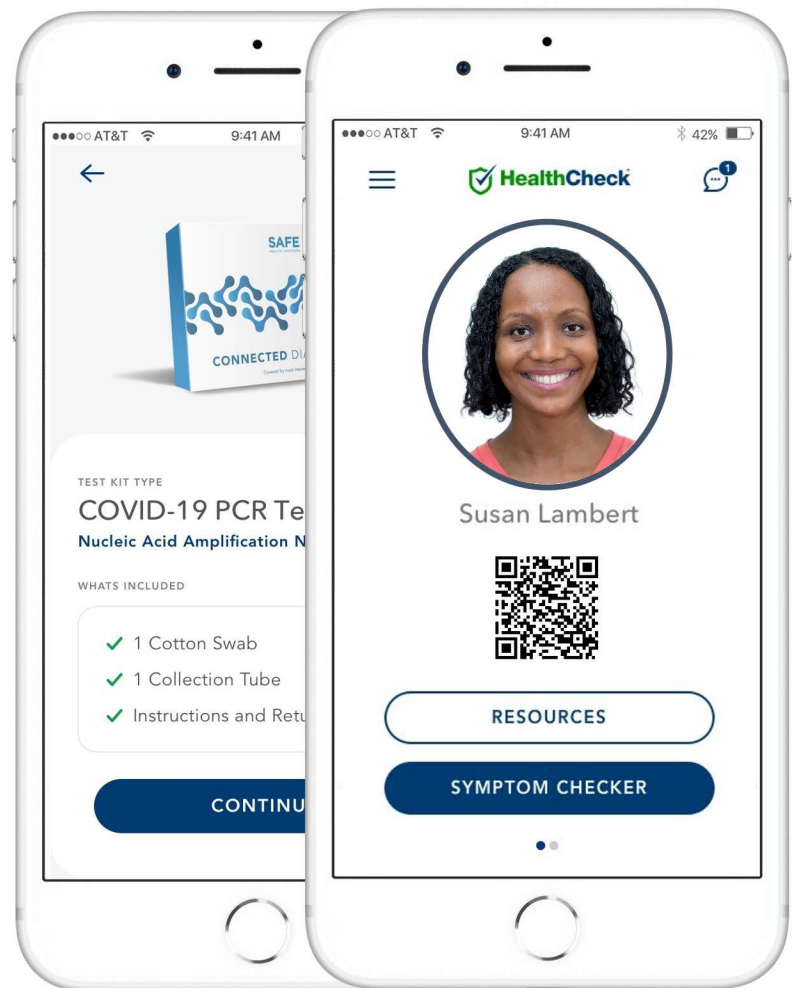

Flexible testing options include both home test kit delivery and rapid onsite real-time antigen, antibody, and rapid molecular testing for early pre-symptom infections.

Health Status Access Control

Digital application for secure, privacy-protecting health status verification enables automated access control workflows and operational reporting.

Connected Diagnostics enables early detection onsite and cost avoidance

- Onsite real-time molecular testing for early pre-symptom infections with results in 20 minutes through our partnership with Cue Health
- Integrated test kit delivery workflow provides safe and convenient testing for students and faculty
- Telehealth consultations and seamless e-prescribing

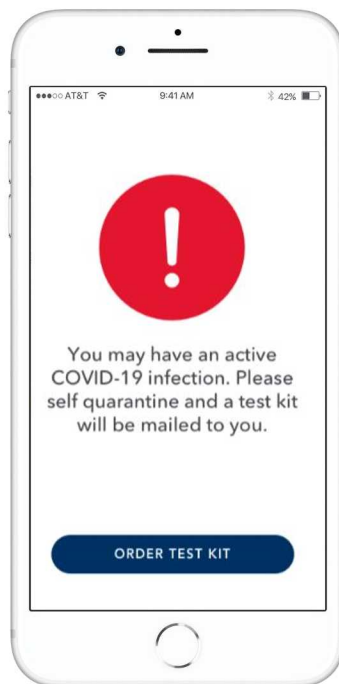

Here's how it works

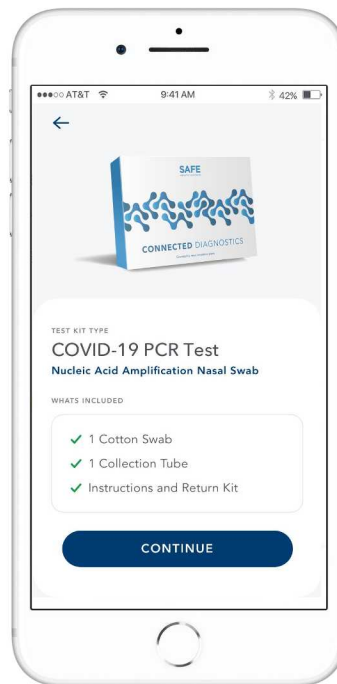

Symptom Checker

Users are prompted to take the symptom checker at predefined intervals and self-report any symptoms.

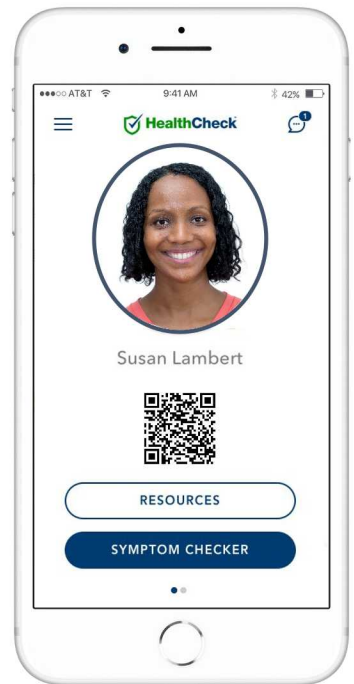

Conditional Response

Users are instructed on next steps based on the results of the symptom checker, including configurable testing options.

Integrated Testing

Multiple integrated testing options, including home test kits, onsite rapid testing, and over 5,000 collection sites

Digital Passport

Health status passport tied to symptom checker self-reporting and testing protocol enables cohesive access control
