

SKC Communications and Poly Partnership with Google Poly and Google Partner to Support the Launch of the Google Voice Platform

SKC and Poly (formerly Polycom) have a new and growing Alliance partnership with Google to support the launch of their Voice platform. Google Voice for G Suite is Google's new business-grade hosted voice service designed for G Suite customers of all sizes. Google Voice offers many possibilities within education. It provides the ability to obtain phone numbers, connect the Google Voice number to all other phone numbers a person has, and forward these phone numbers to the Google Voice number. With Google Voice, there are even capabilities to transcribe voicemail messages. The Polycom VVX x50 Obi version 6.3.1 (Obi Edition) or later Edition phones allow this smooth process to become easier, as these phones are already equipped with Google Voice for G Suite.

These phones are the first IP phones supported and certified for Google Voice for G Suite. The phones will work with Google Voice right out of the box, and provisioning is easily done via the G Suite admin portal. These phones offer the high quality that Polycom (now Poly) has always been known for. They provide top of the line designs, Polycom HD Voice and Polycom Acoustic Fence. Polycom HD Voice provides twice the clarity of ordinary phone calls and Polycom Acoustic Fence minimizes peripheral noises and distractions. With these phones, you get all the benefits of Google Voice for G Suite and the outstanding quality of phones and experiences that Poly provides. SKC is proud to be a recommended partner!
