

Case Study

The Governor's Academy Case Study

A historic preparatory school saves 25+ days annually by eliminating manual workflows with Corpay's AP Automation solutions.

CASE STUDY

THE GOVERNOR'S ACADEMY

Industry: Education

Founded: 1763

Location: Massachusetts

Students: 406

“Corpay makes us more efficient and secure. Implementation was super easy too. I'd recommend Corpay to other schools.”

—

Director of Finance
The Governor's Academy

Client Profile

Founded in 1763, The Governor's Academy is the oldest continuously operated boarding school in the U.S. Located in Byfield, Massachusetts, the academy has a 450-acre campus with facilities for learning, athletics, and the performing arts, providing a dynamic educational environment for grades 9–12.

Challenges

After experiencing multiple check fraud attempts, The Governor's Academy began searching for a secure solution to reliably pay their vendors and protect school assets. They needed a system that provided secure electronic payments while boosting operational efficiency.

Solution

Corpay (formerly Paymerang) came highly recommended by a peer at a business officer roundtable. The Governor's Academy was interested in Corpay's AP Automation solutions' ability to enhance their fraud protection

and eliminate costly, paper-based processes. With less time spent on printing, mailing, and reconciling checks, the finance team could focus on strategic tasks, making automation a win-win.

Results

Following what the Director of Finance referred to as a “super easy” implementation, Corpay's AP Automation solutions brought impressive results to the academy:

- Over 25 days saved each year by eliminating manual processes
- Thousands in cost savings from reduced postage, envelopes, and checks
- Timely electronic payments sent to vendors and faculty
- Increased security by eliminating manual payment processes
