## Cold Chain

Ensure the integrity of biological samples and proprietary ingredients throughout their journey with our specialized cold chain management. From cutting-edge cold storage facilities to ultra-low temperature (ULT) transport and round-the-clock access to mobile cold rooms, we guarantee safe and reliable services at every step.

## Ambient Storage

From raw materials to capital assets, Tobin Scientific offers comprehensive ambient storage services. Our facilities are equipped with Good Manufacturing Practice (GMP) standards compliant with 21 CFR Part 211 and validated to ISO 9001:2015, providing a secure environment for hosting, managing, and releasing your valuable materials.

## Transport & Logistics

Tobin Scientific leads the industry with nationally recognized transportation and logistics solutions tailored to the needs of laboratories and research institutions. Our services encompass laboratory relocation, principal investigator support, OEM white glove service, and a range of specialized transportation options managed by our expert project managers, ensuring seamless execution and peace of mind.
