If you’d like to award more work to a local contractor with a strong performance record for roofing and weatherization, ask if the firm is a member of the National Cooperative Contractor Network administered by Tremco. Together with E&I Cooperative Services, Tremco is pleased to offer a better way for public entities and qualifying contractors to work together, no matter how large or small the project, where applicable.

Designed to streamline construction projects while ensuring transparency and quality, the National Cooperative Contractor Network Program eliminates the need for “equal to” specifications that may result in inferior products and installation by unqualified contractors. “In-Network Contractors” are prequalified and follow the competitive pricing offered through the publicly awarded and competitively solicited contract available through E&I Cooperative Services.

**Enrolled In The National Cooperative Contractor Network**

If you’d like to award more work to a local contractor with a strong performance record for roofing and weatherization, ask if the firm is a member of the National Cooperative Contractor Network administered by Tremco. Together with E&I Cooperative Services, Tremco is pleased to offer a better way for public entities and qualifying contractors to work together, no matter how large or small the project, where applicable.

Designed to streamline construction projects while ensuring transparency and quality, the National Cooperative Contractor Network Program eliminates the need for “equal to” specifications that may result in inferior products and installation by unqualified contractors. “In-Network Contractors” are prequalified and follow the competitive pricing offered through the publicly awarded and competitively solicited contract available through E&I Cooperative Services.

**Faster Project Cycle Times and Competitive Pricing**

The National Cooperative Contractor Network was established to meet the needs of public procurement managers without sacrificing the quality and reliability of construction products and installation services. Now schools, colleges and related educational entities can award work to qualified and trusted local contractors.

**Among the products and services available through In-Network Contractors:**

- Roofing and building envelope materials
- Best-in-class contractor services, including:
  - Maintenance and repairs
  - Diagnostics
  - Roof restoration and replacement
  - New roof construction
  - Air barrier solutions
  - Indoor air quality related consulting, diagnostics, cleaning, sanitation and remediation
Quality Assurance by In-Network Contractors

In-Network Contractors meet a variety of pre-defined criteria representing industry best practice, including:

- Industry past performance demonstrating technical capabilities
- Financial stability and creditworthiness
- A record of proven safety performance
- Insurance requirements, including liability and workmans’ comp
- Never debarred from public work
- Acceptance of required contract terms and conditions

Working Smarter by Working Together: Tremco and E&I Cooperative Services

The E&I contract that governs the National Cooperative Contractor Network allows education and related facilities to combine their buying power and award competitively solicited contracts that meet compliance requirements. In this case, E&I’s member-driven competitive solicitation process has been validated by the National Institute of Governmental Purchasing (NIGP) as complying with generally accepted procurement standards. This, along with industry best practices, ensures members receive maximum value, quality and transparency. As the Program Administrator, Tremco manages contractor enrollment and contract management.

If you’d like to award more work to a local contractor with a strong performance record, ask if they’re a member of the National Cooperative Contractor Network. If they’re not, encourage them to apply by emailing nccnadministrator@tremcoinc.com.

Tremco Roofing and Building Maintenance, a division of Tremco Incorporated, is a leading provider of high performance roofing and building envelope solutions to public agencies across the country. Our innovative products are engineered for greater long-term performance, reduced environmental impact, and ease of application. Tremco Roofing field advisors are considered the most highly trained in the industry and work closely with In-Network Contractors to customize specifications for optimum results.
