Smarter institutional decision-making support

Focus on facts. Get consolidated data overviews and let staff drill down into the details they need, to do their job and meet their goals.

The chances are you currently rely heavily on disparate systems and complex reports for insights into your institution's students, HR and finances.

This all-too frequent situation in HE institutions can be associated with the following challenges:

- Decision-making impaired by outdated and inaccurate data sets.
- Inability to easily identify issues and underlying causes.
- Error-prone spreadsheets constraining ability to change.
- Static reports with no real-time analysis.
- Limited perspectives.

What if you could eliminate these concerns by using interactive dashboards that integrate data from your Student Management and ERP solution, out of the box? What if you could rely on up-to-the-minute dashboards – appropriate to role – to provide core metrics for the institution, in real time?

Unit4 provides you with a set of HE-specific dashboards. These role-based overviews enable you to harness consolidated program, cost and student enrollment data from across the core strategic platforms, and to drill down through the data to transaction level – revealing underlying trends, patterns, or insights.

The executive interactive dashboards for Higher Education

At any point in time, you can measure performance, identify opportunities and mitigate risks. The dashboards consolidate data from your Student Information System and ERP application and turn it into actionable intelligence.

Each of the role-based dashboards contains institution-wide KPIs, as well as detailed sections for the metrics that support a specific focus area; all of which are vital for your institution. You can also produce your own dashboards to suit the requirements of the institution.

The same set of data can be viewed from different "perspectives" to support decision-making — for example: looking at Revenue by Program or Revenue by Department, and staff have the ability to drill down through the hierarchy.

Here is what your HE institution gets with the pre-built solution

- Comprehensive HR and strategic planning
- Central and decentralized personnel cost planning
  - Personnel planning at employee level
  - B/S and CFS integration
- Standardized HR performance reports
- Research project monitor
- # of students planning and funding
- CAPEX and other OPEX forecasts
- Integrated financial planning
- Standard reporting for (examples)
  - Teaching and studies
  - Finance and personnel
