

VENDOR MANAGED INVENTORY

The Benefits of VMI

VMI offers a range of benefits for your operations, from cost savings to improved data, making it an attractive option for businesses looking to streamline their supply chain process while addressing resource and operational constraints.

- **Reduced Costs:** A VMI tailored to your operational reduces costs associated with inventory management and storage.
- **Increased Efficiency:** A VMI increases efficiency by streamlining your supply chain process.
- **Improved Accuracy:** VMI improves accuracy of your inventory data and forecasting.

Cenmed VMI Solutions

VMI offers a range of benefits, from cost savings to improved data, making it an attractive option for operations looking to streamline their supply chain process.

Onsite Solutions				Offsite Solutions	
 <p>REPLENISH IMMEDIATELY</p> <p>Cenmed periodically visits your facility, physically reviews inventory levels, immediately replenishes with on-hand inventory (physically stocks the inventory on the customer's shelves).</p>	 <p>DELIVER LATER</p> <p>Cenmed periodically visits your facility, physically reviews inventory levels, places an order for replenishment inventory to be delivered later. Depending on the program, Cenmed may do the physical restocking, or your staff may replenish inventory when delivered.</p>	 <p>INVENTORY PLANNER</p> <p>Cenmed provides an on-site inventory planner who works full-time at your facility managing the inventory in coordination with your operations.</p>	 <p>OPERATE FULLY + CUSTOMER FACILITY</p> <p>Cenmed leases space within the facility and runs the warehouse and inventory planning operation with our own employees from within your facility.</p>	 <p>CUSTOMER PROVIDED DATA</p> <p>Your operations periodically (daily, weekly, etc.) provides Cenmed with current inventory levels. Cenmed reviews inventory levels and creates replenishment orders. Replenishment orders are shipped to your facility where your operations perform all physical tasks related to the inventory.</p>	 <p>CUSTOMER PROVIDES DATA</p> <p>Cenmed has direct access to your inventory management system and with real-time data management related to on-hand levels, open orders, forecasts, production schedules, etc. Cenmed makes replenishment decisions based on this data and ships orders to you.</p>

Automation/AI Opportunities

Artificial Intelligence (AI) has revolutionized warehouse management by optimizing inventory forecasting, automating routine tasks, and enabling data-driven decision-making, ultimately enhancing operational accuracy and efficiency to unprecedented levels.

- **Increased Productivity:** Predictive analytics for equipment optimization and maintenance.
- **Increased Accuracy:** Enhanced logistics and order fulfillment.
- **Increased Safety:** Real-time asset tracking and warehouse visibility.
