

WellBAC[®] CUSHION

OUR CUSHION BACKING COMES STANDARD.

Open Cell Cushion.

Milliken's innovative open cell cushion provides the best combination of durability and support, with superior protection against wear and tear.

Unlike closed cell cushion, our Polyurethane cushion plus felt backing has superior performance to PET (Polyester) cushion.

SUSTAINABILITY

- Carbon Neutral as part of our M/PACT Program
- Material Health 3rd party verified Declare Red List Free with 100% transparency.
- Cradle to Cradle Silver certified healthy, climate positive, and equitable.
- Uses 34.9% pre-consumer recycled content and helps prolong the carpet life expectancy.

BETTER INDOOR AIR QUALITY & SAFETY

- CRI Green Label Plus Certified - lowest emitting carpet, adhesive and cushion products on the market.
- No PVC or Plasticizer (Phthalate-Free)
- PVC-free and 100% recyclable

MOISTURE MANAGEMENT

- No need for pH or RH testing. We warrant our carpet going down on high moisture slab.
- No need to apply floor surface primer.
- Breathable open cell cushion allows moisture in subfloors to escape.
- Minimizes damp conditions, reducing the environment for mold and mildew.

ACOUSTICS

- 50% more sound absorption and 50% more sound reduction through floor and in room sound versus hardback carpet.

ERGONOMICS

- Extended periods of standing or walking are known to cause fatigue which negatively affects concentration, decision making and mood.
- Our cushion backing decreases muscle strain by 24% when compared to hardback carpet.

APPEARANCE RETENTION

- The shock absorption qualities of cushion also provide performance benefits.
- Milliken cushion-backed carpet lasts longer than hardback products will.

FACE FABRIC

Patterns and structures made up of nylon yarns with our state of the art tufting technology.

PRIMARY BACKING

The face yarn is tufted through a high quality non-woven textile. The structure of the textile holds the yarn in place acting as the primary backing.

PRECOAT

The precoat layer locks the tufted yarns in the primary backing to ensure good tuft bind strength between the yarns and the backing.

FIBERGLASS

A high quality fiberglass layer is embedded in the polyolefin compound to ensure dimensional stability of the tile.

SECONDARY BACKING

Proprietary Polyolefin compound layer formulated by Milliken R&D scientists to create a durable and stable tile. Our formulation does not contain PVC or plasticizers.

PREMIUM CUSHION

WellBAC[®] Comfort and Comfort Plus incorporate a premium cushion layer, designed to provide additional health and wellness benefits.

FELT BACK

A protective non-woven textile layer provides a breathable non-reactive finish. It enhances health and wellness.

Milliken's standard cushion backing system — offering enhanced underfoot comfort, acoustic and wear performance.
