

Contain Your Printing Costs— Without Sacrificing Quality or Security

In today's K-12 private and public schools, budget constraints and environmental concerns have forced many teachers and administrators to rethink how they use printed documents. While no one wants to compromise on document quality, everyone wants to use paper more thoughtfully and economically.

Canon imageCLASS printers can help teachers and administrators:

- generate high-quality handouts;
- contain costs; and
- secure printed documents to help ensure Family Educational Rights and Privacy Act (FERPA) compliance. These models also provide students with easy access to printing, copying, scanning, and other paper-related tasks.

Reduce Printing Costs

Printing devices are important to K-12 education, yet they can have a significant impact on budgets. Excessive color printing, inefficient processes, and personal copying can slowly drain resources. Canon imageCLASS solutions not only help reduce wasteful printing and copying, but they also encourage teachers to make better printing decisions.

Canon imageCLASS printer features that can help reduce costs:

- **Pure black technology**—Prevents wasting color toner on black-and-white documents
- **Duplex printing**—Reduces paper usage
- **2-in-1 or 4-in-1 copying**—Reduces paper usage
- **Toner saver print mode**—Allows for more economical toner usage when printing documents
- **Single-cartridge system**—Assures cost-efficient and maintenance-free supplies replenishment

Save Time and Improve Printing Efficiency

With so many students and teachers using printers, efficiency is more important than ever. Waiting for printers to warm up and large jobs to complete can waste valuable time. And sending electronic documents to a busy printer may force users to go back to their PC and start the process over. Canon technology offers time-saving features that help K-12 teachers boost printing efficiency, so they can focus on other tasks.

Canon imageCLASS printer features that can help save time and improve printing efficiency:

- **Quick first print**—Requires minimal warm-up time for faster job turnaround and less waiting
- **Print direct from USB**—Enables students and teachers to carry several electronic documents on a single USB and print directly from that device
- **Searchable PDFs**—Enable keyword search of large documents stored on a central server to expedite research of such files
- **Simple Solution Keys**—Allow you to access functions right from the control panel
- **Extra paper tray**—Makes it easy to process large print jobs without reloading paper

Keep Documents Secure

K-12 schools have documents and student information—like student records and grades—that must be kept private and secure to comply with FERPA. Unauthorized faxing, sending, and printing of protected information can result in stiff penalties for schools. Canon technology is equipped with security features that help to protect confidential student information and help ensure FERPA compliance.

Canon imageCLASS printer features that can help secure important documents:

- **Secure print**—Allows you to send a file to a printer, and then print it only when you've entered your user name and password while at the device
- **Fax forwarding**—Enables faxes to be forwarded to other fax machines, e-mail, or network folders*
- **Send**—Requires authentication to send documents to an e-mail address or network folder

*Not available on all models.

Generate Higher-Quality Handouts—Fast

Providing students with supplemental information that goes beyond textbooks is essential in K-12 schools. With the imageCLASS Series, teachers can simply scan materials and print a composite document. Canon makes it easy to print high-quality images in both color and black and white.

Canon imageCLASS printer features that can help generate higher-quality documents:

- **Superior Color Imaging**—Allows teachers to draw attention to specific content, thereby resulting in better student comprehension and retention
- **Pure black technology**—Prevents wasting color toner on black-and-white documents
- **Text/Photo default mode**—Ensures the best copy quality for documents with pictures and text while also saving toner

Meeting the Unique Needs of K-12 Schools

Today's public and private K-12 schools need printing solutions that make it easy to contain costs and deliver more efficient workflow processes. Canon printing solutions provide the tools required to reduce expenses, improve productivity, and secure documents.

With Canon imageCLASS printing solutions, school administrators can promote and achieve more environmentally conscious behavior with energy conservation.

For K-12 school administrators in search of budget-friendly ways to contain costs without sacrificing efficiency, security, and quality, look to Canon's imageCLASS printer solutions.
